

Description

Save time restocking dispensers with 50% compressed paper hand towels that double dispenser capacity. Guests enjoy a premium experience with these soft and absorbent hand towels. One-at-a-time dispensing helps improve hygiene and reduce waste as guests only touch the towel they take. Our compact dispensers fit into small spaces for maximum convenience. For best use, do not use product in combination with Tork Xpress Countertop Multifold Hand Towel Dispensers: 552200, 552208, 460005.

- Bring extra comfort to guests in high-end establishments with these soft, thick and large hand towels
- Reduce paper towel consumption in your washrooms and improve hygiene with one-at-a-time dispensing
- Reduce waste and increase cost savings – these hand towels are quick-drying and absorbent, so guests don't use as many
- Maximise your space – use these compressed paper hand towels with the compact Tork Xpress® dispenser in low-to-medium traffic washrooms
- QuickDry

Product Details

System	H2
Color	White
Folding type	Multifold Z
Panel	3
Print	No
Unfolded Width	21,2 cm
Folded width	21,2 cm
Pulp Quality Indicator	3
Folded length	8,2 cm
Ply	2
Total Grammage	43,5 g
Unfolded length	24,2 cm
Roll/Piece Net Weight	2,23 g
Fibre Type	Virgin
Roll Gross Weight	2,28 g

Environmental Information

Content

The product is made from

Virgin pulp

The packaging material is made from paper or plastic.

Material

Virgin fibres

There are different methods used today for bleaching: ECF (elementary chlorine free, where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Virgin pulp fibres are produced out of softwood or hardwood. The wood is subject to chemical and/or mechanical processes where the cellulose fibres are separated out and lignin and other residuals are removed.

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

Chemicals

All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view.

To control product performance we use additives:

- Wet strength agents (for Wipers and Hand Towels)
- Dry strength agents (is used together with mechanical treatment of the pulp to make strong products like wipers)
- For coloured papers dyes and fixatives (to secure perfect fastness of the colour) are added
- For printing products printing inks (pigments with carriers and fixatives) are applied
- For multi ply products we often use water soluble glue to secure the integrity of the product

In most of our mills we do not add optical brighteners.

We do not use softeners for professional hygiene products.

High product quality is secured through quality and hygiene management systems throughout production, storage and transport.

In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibres to prevent fiber loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

To reuse broke we use:

- Pulping aid (chemicals that help to repulp wet strong paper)

In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.

Food Contact	This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.
Environmental certification	This product is certified for the EU Ecolabel with certificate number SE/004/001. This product is certified for FSC®.
Packaging	Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
Article creation date and latest article revision	Date of issue: 29-09-2023 Revision date: 21-05-2026
Production	This product is produced at Kostheim - DE mill and certified according to ISO 9001, ISO 14001 (Environmental management systems), CoC-PEFC, EMAS (eco-management and audit scheme), ISO 45001, ISO 50001 and FSC Chain-Of-Custody.
Destruction	This product is mainly used for personal hygiene and can be collected together with household waste.
