Product Testing

48 hrs single patch test results have been validated by an external dermatologist to show the product to be "non-irritant"

Environmental Information

Content/Ingredients

Soaps are formulated using ingredients that have different functional properties. Essity puts strong emphasis on using carefully selected ingredients in our soaps. All ingredients are assessed from a product safety and environmental point of view.

At least 94% of the ingredients in Tork soaps are from natural origins, according to ISO 16128, the calculation includes water. Our EU ecolabel certified soaps meet strict criteria that guarantee excellent environmental performance, including low toxicity to aquatic organisms, biodegradable ingredients, restricted use of hazardous substances and good performance. This soap is also manufactured in a production site that uses purchased certified renewable electricity.

Results from life cycle assessments performed by Essity has shown that the water used to rinse off the soap has a significant impact on the total carbon footprint from use of soap. The impact is primarily driven by the energy use to heat the water and the amount of water used. Consequently, the carbon footprint can be reduced by using less water at a lower temperature when rinsing off the soap.

Environmental certification

This product is certified for the EU Ecolabel with certificate number SE/030/002.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

Article creation date and latest article revision

Date of issue: 13-01-2023
Revision date: 27-05-2026

Production

The production site is certified according to ISO 9001 and ISO 14001. Cosmetic GMP ISO22716: 2007

Disposal

Bottle is collapsible, leading to 70% less waste volume. Based on Essity test
The empty bottle can be sorted as plastic packaging and the transport box can sorted as cardboard. Please observe local and regional regulations on waste management.
